Foldable Large Containers

With the Supply Chain being more challenging than ever before, such as longer transport distances and the effect on the environment, our Magnum Range is the complete returnable packaging system which offers many advantages over other conventional packaging systems such as one trip systems.

The use of foldable/ returnable packaging can revolutionise your handling and logistics requirements with many cost effective solutions.

The containers come in different sizes with maximised volume capacity to handle your products. The foldability facilitates economical return transport. The containers are easily folded and erected with minimum effort and are ready for immediate use.

The ranges available are a truly returnable packaging solution and can be repaired/recycled at the end of their life. Create space you never knew you had, and start saving with the Schoeller Arca Systems Magnum range of Foldable Large Containers.

MAGNUM SMOOTH WALL

Smooth wall containers are manufactured using our unique injection moulded /welding technology. All necessary reinforcement structure is positioned in between the smooth welded walls. This gives a smooth surface both on the inside and outside of the containers for maximum hygiene and product protection.

MAGNUM CLASSIC

The Classic design is based upon our many years of experience producing this type of durable Folding Container. The material used is structural foam for maximum strength and stability. The external rib structure design gives additional strength performance.

MAGNUM EXTENDED

The extended container product range is designed and produced using cut-and-weld technology with the standard Classic versions being used for all the components required. The containers are reinforced with metal components in the side walls and base for added strength and stability.

Pallet unit 70

④

2636.820 Lid for MAGNUM SH 680/835 HD
External 800 x 600 mm
Weight 1.8 kg
Colour Black
Pallet unit 26

Additional benefits

CUSTOMIZATION

Company logos container identification information etc. can be printed on plates attached to the base. RFID tags can be fitted in safe positions on all containers. FLC lids can be equipped with seal straps. With certain, minimum quantity restrictions, containers can be delivered in customer-determined colors. Please contact us for further details.

EASY TO REPAIR

All Magnum FLCs can be repaired easily in case of damage. Components can be removed and replaced without special tools. Please contact a Schoeller Arca Systems representative for detailed product-specific repair manuals.

EXAMPLE OF A SEGMENT THAT WE WORK IN...

PRESENTING – AUTOMOTIVE

Key features of the automotive industry are that it is global, intensely competitive and forever changing, be it with new vehicle launches or upgrade existing models. As a result, companies supplying the automotive industry must also be global, ready to change with them be it the suppliers of components/car parts in all shapes and sizes as well as the packaging providers.

Schoeller Arca Systems are such a company in respect of packaging, where we welcome the challenge to provide cost saving products/ packaging solutions to move with the times and to ultimately meet with our customers' requirements be it the Car Manufacturer or their supplier of components. We are global, have a wide product range and have an extensive experienced sales force to meet these challenges, from offering simple solutions to more complex total packaging solutions.
