Intermediate Bulk Containers

REDUCE COSTS BY UP TO 50%

Combo employs the Bag-in-Box concept. A flexible liner bag safely holds the liquid contents, while a rigid but foldable outer container protects the bag. Together, they form a highly compact design that maximizes space and pay-load in all modes of transport, including both the delivery of the filled unit and its return, once emptied and folded. Studies comparing the Combo with other bulk packaging solutions demonstrate considerable cost savings with the Combo. Using the Combo system can reduce your overall distribution costs by up to 50%.

SIMPLICITY, SAFETY AND HYGIENE

The liner bag is always delivered directly from the production line, always clean and sterile. There is no need to pre-clean or

prepare anything before filling; just attach the airtight filling system and start to fill.

The inside of the liner is in vacuum. When filled, it therefore creates a sealed volume of liquid, completely protected from contact with oxygen.

During emptying there will be no oxidation. This guarantees that contents are not contaminated, and that none are wasted. When filled, the Combo is a safe and tight unit, dust and watertight.

The containers are very tough - designed to withstand impacts, stresses and strains that occur during road, rail and sea journeys. They can be stored for long periods outdoors, and also in freezer rooms.

ComboLife™ 65
Internal volume 250 l
External dimensions 809 x 609 x 833 mm

ComboLife™ 285
Internal volume 1060 l
External dimensions 1155 x 1155 x 1132 mm

Easy to fill and empty.

EXAMPLE OF A SEGMENT THAT WE WORK IN...

PRESENTING – COCA-COLA

Schoeller Arca Systems' "Combo" efficiently carries Coca-Cola concentrate to McDonald's restaurants all over the world. Based on a 250 litre plastic foldable bag-in-box, this system was specifically developed for soft drinks products and the Coca-Cola Company's distribution needs. Fibre-free containers make product handling easier, safer and more hygienic, while reducing both costs and waste.

RESULTS

The customer's switch from 20 liter bag-in-boxes to the Combo bag-in-boxes that began back in 2002, will soon be completed in Europe. Meanwhile, Coca-Cola is exploring the possibility of employing this system in other parts of the world.
