Stack Nest Containers

Our high-quality stack/nest containers fit snugly into each other when empty, and stack securely when full. This feature allows you to reduce their space requirements by as much as

70% for return trips. Made of polypropylene to food-industry standards, our stack/nest containers stand up to the toughest multi-trip demands.

JUPITER™

Jupiter's flat, compact base makes it ideal for stable, safe travel on conveyors and other logistics systems. The handgrip design facilitates easy, comfortable manual handling. Containers can be fitted with label areas or code strips for automatic routing. Several versions of lids are available including a foldable lid, which can be flipped to cover the box for nesting.

TELLUS™

Available in a wide variety of dimensions, Tellus is a popular choice in Europe. It has a spacious interior, smooth sides and a flat, compact base that makes it suitable for use on conveyors. The handgrip design facilitates easy, comfortable manual handling. Containers can be fitted with label areas or code strips for automatic routing. Several versions of lids are available including a foldable lid, which can be flipped to cover the box for nesting.

INTEGRA™

Employed by retailers like H&M, Integra is the perfect warehouse-to-store solution. These light, flexible containers can be repacked conveniently with clothing, accessories, textiles, and other retail products. Being easy to unload, they help minimize time spent at the store. Integra is the right size for manual handling and stacking by one person. With the integrated lid flipped to the closed position, it stacks stably. When nested, the volume of Integra is reduced by 70%!

EXAMPLE OF A SEGMENT THAT WE WORK IN...

PRESENTING – H&M

Hennes & Mauritz uses the Integra for delivery of clothes. The container is used from the warehouse (DC) where the bulk of goods arrives and is repacked in our Integra in suitable batch sizes, and delivered out to the different H&M stores.

As the container shall remain as short time as possible in the shop - in order not to disturb customers - the design of the container enables easy and straight forward emptying.

The main benefits for H&M are the size of the container, all parts are integrated where the lid will not get lost and is always available. A good return ratio when nested, in return transport and storage nested containers take up 70% less volume.

The lid is easy to seal for protecting the attractive content. The lid also protects the contents from wet, dust and dirt. The container has good ergonomics, with matching behavior on conveyor belts and labeling possibilities.
