quality products made in the UK

All equipment featured in this brochure is manufactured in the UK using the latest equipment and skilled labour to produce high quality products at competitive prices in a specific lead-time.

PLANT & EQUIPMENT

The company manufactures and distributes from 30,000 square feet of factory, warehousing and offices based in Batley, West Yorkshire.

The latest equipment and skilled labour are employed to produce high quality products at competitive prices in specific lead-times. The company utilises Salvagnini panel bending technology and Amada punch presses.

The company has recently invested in brand new powder coating facilities and a 4,000 square foot warehouse built within the 2.5 acre site as part of a continuous improvement program.
