

Mobile storage

bott's range of mobile storage products gives customers the flexibility to safely move tools, equipment, components and work surfaces to wherever they're needed.

All feature four heavy duty castors (two fixed; two 360° swivel with foot brakes) – and mobile storage units with drawers feature a safety trigger mechanism that means drawers cannot open accidentally. Drawer blocking as standard means that only one drawer can be opened at a time, optimising stability in use.
