

When standard height shelving still does not meet your needs maximise space utilisation and reach for the sky!

META HIGH-CLIP

We are a competent supplier with a philosophy of actively exchanging views with our clients.

The result of this stance is the constant development of new products and the improvement of existing ranges.

Combined development

The **new** upright profile combined with the **proven** META MULTI STABIL® shelf form the basis of the META HIGH-CLIP high bay shelving system.

Shelving runs up to 12 m high are possible – optimising storage in the available space.

META HIGH-CLIP offers:

- Optimal utilisation of ceiling height – up to 12m
- 100 % horizontal clear entry to shelf length
- Shelf lengths of 1.000 or 1.300 mm
- Shelf depths 300 – 800 mm
- Shelf vertical adjustment at 25 mm centres
- Shelves are clipped
- Frames are delivered knocked down for ease of transport
- Bolted construction is also possible when appropriate
- Shelf load capacities from 80 – 400 kg
- Bay load capacity up to 7,5 tonnes
- Galvanised or powder coated finishes (in a range of colours)

Shelf fixed by clip

Shelf beam with safety clip

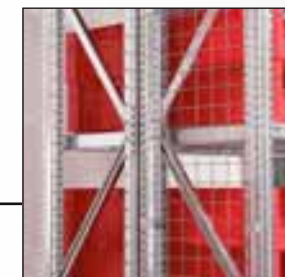

HIGH-CLIP uprights back-to-back with spacer

Frame bracing on single run rack

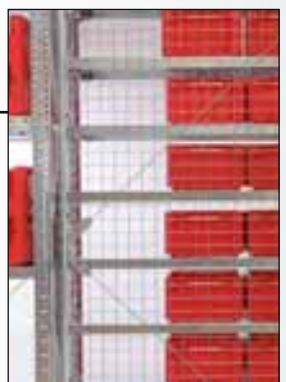

Back cross bracing with 4 point fixing

Frame bracing on double run rack

Cross bracing fixing

Mesh side and back security cladding

Uprights with base plate for floor bolting

Base feet with levelling plates for floor bolting

The upright in powder coated finish:

Supplied up to 6 m in single length and up to 12 m in spliced length.

Powder coated in RAL colours.

Splicing component – this also enables retro-fit of upright extensions. The shelf adjustment is maintained at 25 mm even in the spliced section of the uprights.

META HIGH-CLIP

1 System = 2 solutions!

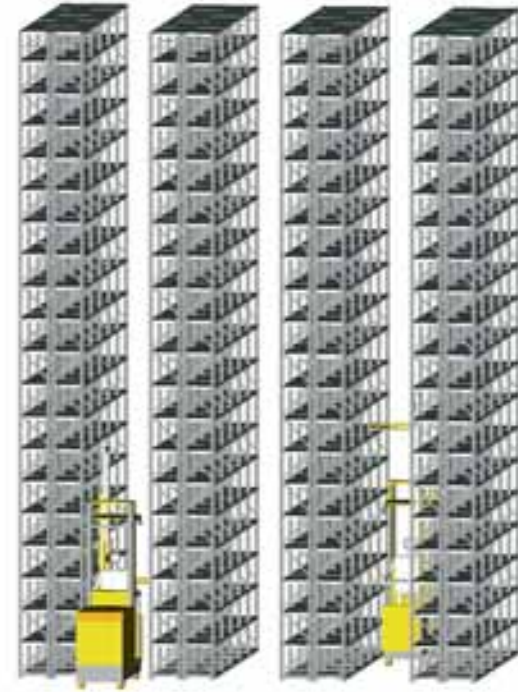

High bay shelving

Specifications:

- Rack heights to 12 m
- Shelf depths: 300, 400, 500, 600 and 800 mm
- Shelf type Load capacity

L 80	80 kg
MS 230	230 kg
MS 330	330 kg
MS 330	400 kg*

Multi-tier shelving

With this solution the optimum use of the available space is achieved. Alternatively initial shelving can be constructed to a height which meets current needs and then taken higher as requirements increase. The design of META HIGH-CLIP allows the easy addition of extra tiers to a maximum height of 12 m – phasing the capital investment to the need.

Standard features

- Rack heights up to 12 m
- Bay loads up to 7,5 tonnes
Shelf loads up to 400 kg
- Shelf adjustment on 25 mm centres
- Total clear entry on shelf lengths of 1.000 and 1.300 mm
- Up to 5 tiers high

The META shelf – your guarantee of safety and strength

The new META HIGH-CLIP upright profile builds upon the strength and reliable performance of the totally proven range of META shelves – these fundamental components ensure total performance in both high bay and multi-tiered solutions.

- Long lasting service life based on top grade materials to DIN EN 10147
- Safety ensured by the complex five fold M shelf edges with load capacities from 80 kg L80 shelves to 400 kg MULTI STABIL shelves
- Low profile shelf section to maximise storage space L80 at 25 mm and MULTI STABIL at 40 mm
- Available finishes
 - Galvanised für maximum corrosion protection
 - Powder coated with high scratch resistance and colour options
