Commercial Storage Systems

Quality & Storage

The diverse storage requirements of the commercial market can be distilled down to 4 main needs. Essentially a proposed storage solution should be flexible, adaptable, reliable and perhaps most importantly, represent value for money.

To meet these criteria, we are proud to recommend to you:

- A storage system for the commercial environment.

CAPITAL is a flexible storage system that is robust in the storeroom and refined in the office. Shelves and filing accessories are adjustable on a 25mm pitch allowing maximum usage within the bay. Additional components can be retrofitted and bays can be extended to increase capacity. The 'triangular' front edge of the side upright not only ensures safety, but also presents a neat appearance, which is enhanced by a superb polyester, epoxy powder coated finish. Wood effect end panels can be fitted to match desks and other office furniture.

CAPITAL is designed and manufactured in accordance with the requirements of ISO9001 and complies with the relevant Storage Equipment Manufacturers Association codes of practice for static and mobile shelving.

Quality & Storage

Office space is an expensive commodity that you cannot afford to waste. You need a cost-effective storage system to meet your current demands and future expectations. CAPITAL presents a wide range of standard components that can be combined to create a tailor made solution to address the specific requirements of the individual. You can determine how much capacity should be given to box storage or filing.

- Shelves for boxed item storage.
- Duplex shelves for conventional storage and suspended filing.
- Lateral filing cradles for cost effective file storage.
- Pull out shelf for a space saving writing surface.
- Telescopic filing cradles for low level accessibility.
- Tambour doors for security and improved general appearance.

Accessories can easily be retrofitted as your business develops.

Choose a static option for maximum access or mobile for maximum capacity.

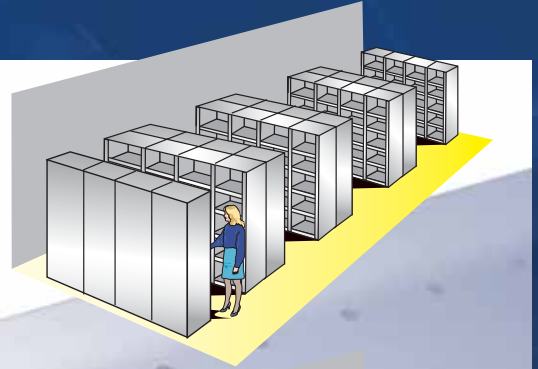

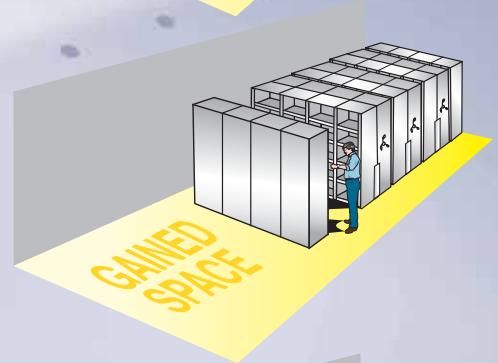

Commercial Storage Systems

Saves Space

Conventional Static System.
Ideal for frequent access to store & retrieve documents.

Mobile Option 1.
Saves space by as much as 45%.

Mobile Option 2.
Increase capacity by as much as 100%.

Part Height Dividers

Lateral Filing Cradle

Telescopic Filing Cradle

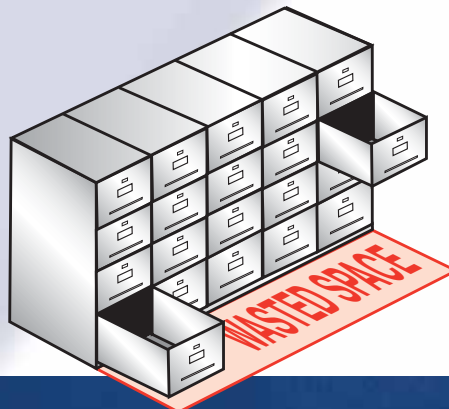

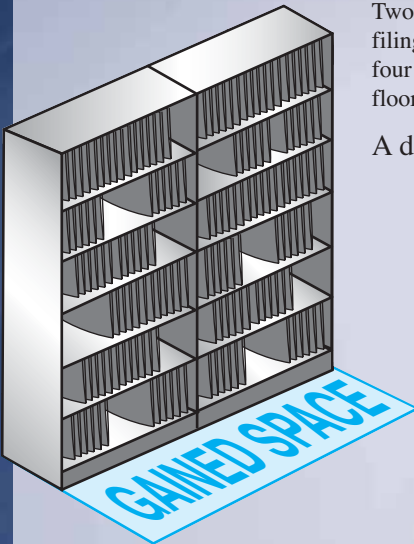

Garment Rail

An effective alternative

Two bays of Capital with 6 No. levels of lateral filing will give an estimated capacity equal to 5 No. four drawer filing cabinets. Save up to 48% of your floor space and save on the cost.

A double saving - a 'Capital' idea.
