Spill Control

A range of products designed to prevent costly spills and leaks of dangerous liquids from storage containers. Suitable for safely handling car batteries, 200 litre drums, 1,000 litre IBC's, etc.

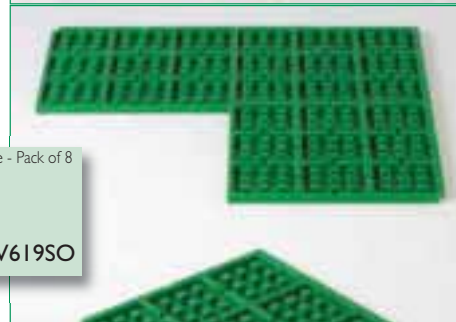

- **100% plastic:** Will not rust and is resistant to most corrosive substances
- **Economy:** Low cost maintenance-free, helps save on floor cleaning, reduces potential environmental damage
- **Ergonomics:** Safe smooth rounded designs to help prevent operator injury
- **Handling:** Lightweight with four way entry pallet bases
- **Space saving:** Most units stack to save space when not in use
- **Customisation:** Most units have areas for clear product content marking

Spill Control Floor Tile Kit

- For internal and external use
- Completely Polypropylene manufactured and therefore ideal to store acids and alkalis
- 2.5 litres retention volume per tile
- No tools required for assembly
- L x W x Hmm 508 x 508 x 30mm
- Weight 1.4kg

Chemical Storage & Dosing Tanks

- Designed for the storage and mixing of chemicals typically used in water treatment
- Manufactured from food grade medium density polyethylene which is corrosion and UV resistant
- Graduated scale moulded into the side of the translucent tank for quick level reading
- Maximum density of liquid stored, 1.9kg/litre
- Reinforced top surface to mount mixing equipment and/or dosing equipment together with electrical control devices
- Screw cap of 125mm for smaller tanks and 250mm for 500 and 1000 litre units

PolySafe Depots

The PolySafe Depots allow the safe storage of hazardous liquids such as acids, alkalis or oils. By the use of the variable shelving system a combined storage of small canisters and 205 litre drums is possible. **Not suitable for flammable materials.**

PSR type with PE-Grids

- For internal and external use
- Completely PE manufactured and therefore ideal to store acids and alkalis
- Lockable, roller slide front closing door
- Suitable for small canisters and vertical storage of 60 litre drums
- Outside measurements W1520 x D1010 x H1700mm
- Inside height 1250mm, sump capacity 225 litres

PSD type – outside use

- Manufactured from environmental friendly PE – resistant against acids and alkalis
- Two sizes available. Galvanized or PE-grid options
- Integrated double-layered sump with 225 litres available
- For 205 litre drums and small canisters using shelving system
- Flat-packed for low costs, easy assembly in only 10-15 minutes

Steel Drum Cabinets

For substances hazardous to water

The compact size of these drum cabinets provide the perfect solution to safe storage, where space is at a premium. The interior height is sufficient to allow use of pumps and funnels.

- Single or double
- Lockable
- Suitable for internal and external applications
- Optional shelf available for storage of smaller containers
- Galvanised and painted catchment sump
- Delivered flat-pack for self assembly

Emergency Spill Response Kits

General Purpose Pads and Socks

For the purpose of absorbing most industrial type fluids including non-agressive chemicals.

Manufactured from recycled materials. These pads are both strong and highly absorbent. General Purpose socks are suitable for placing around machinery.

Super Absorbent Socks

Strong tubular structure allows for durability and expansion. Filled with a super absorbent polymer, that will absorb many times its own weight in fluid.

Oil Only Pads and Socks

Pads- Handy Sized sheets ideal for the cleaning of tools and machinery and general spill control.

Socks- Oil only socks have a strong tubular knitted outer for extra durability.

Vehicle Spill Kits

Quick response kit designed for smaller spills. Fits neatly behind drivers cabin seat. VGK2 has a waterproof PVC coated Nylon Bag. VOK1 is suitable for oil spills.
