Features

Synchronised Movement

The flexibility of seat and backrest angles with easily accessed separate lever controls.

Bodyweight Tension Control

A handwheel adjustment to control the movement of the chair in relation to bodyweight.
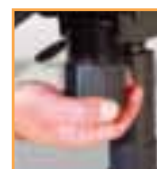

Seat Slide (optional)

A smooth lever operated function to increase seat depth for individual users.
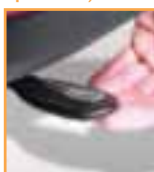

Back Height Adjustment

Standard on all models, a simple leverless lift-up ratchet back system alters the backrest position.

Inflatable Lumbar (optional)

Simple pump action for adding additional lumbar support where required. A valve depresses to deflate.

Sculptured Back Detail

Competitive products often compromise on style and features. Solar maintains a look of quality through features such as this elegantly sculptured back plastic.

Height Adjustable Arms

Solar comes standard with Height Adjustable Arms offering ease of use whilst providing support and comfort.

Seat Height Adjustment

A seat height adjustment of between 430-560mm can be achieved by means of pnuematic height adjustment which supports up to 150kg.
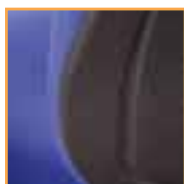

Seat & Back Adjustments

Independent Seat & Back Adjustment provides maximum user comfort.

Seat Slide Adjustment

Variable seat depth adjustments can be made giving the user improved support.

Inflatable Lumbar

The Inflatable Lumbar device offers a simple yet effective additional support to the lumbar region.

STORAGE DESIGN LIMITED

Drawing Storage

Working drawings are often a problem…

…especially on site as they need to be viewed often, and by various trades, yet they need to be kept clean and available at all times.

Drawings are often supplied in a variety of sizes so the Planhorse system adapts to these requirements.

The system revolves around this cleverly designed aluminium clamp

This design is simply the total solution for what often is a difficult problem particularly in the construction industry or on the shop floor. Drawings or documents can be placed into the clamp - then when the adjusters are tightened the drawings are held firm. This allows for groups of drawings to be held together - and being portable means that they can go out to site as required. The Planhorse clamps are available in assorted lengths to fit the common standard paper sizes.

They fit into various different storage units shown below.

Holds up to 100 sheets in one clamp

Decide the size and amount of drawings you want to store - then just order individual or complete units

- Economic use of space
- Wall bracket for 5 or 10 clamps

- Wall bracket for 20 clamps

Planhorse

Trolleys and clamps

You can order Planhorse however you want, to suit your needs. Shown below are trolleys complete with the clamps in the various paper sizes. Wall and flip chart brackets are also available to best utilise your available space.

Key Vault Systems

Designed to meet the requirements of insurance companies, the key vault provides the tried and tested method of control and tracking of keys but with far greater security.

The body is constructed from 2.5mm steel with a 3mm door (max). It has a euro half cylinder locking (this can be replaced upon delivery of the cabinet to integrate with your system).
