## APEX Pallet Racking

### Why choose APEX Pallet Racking

- Designed for strength, durability and easy assembly
- Best design, widest range & best prices
- Wide range of beams and frames available
- Versatile options to suit standard applications

APEX Pallet Racking is designed and manufactured in accordance with all major European and British quality approval systems (ISO9000).

Meets and in many cases exceeds all standards set by SEMA (Storage Equipment Manufacturers' Association).

Helping to set the standards of design and manufacturing within industry

### How do I order APEX Pallet Racking?

The standard components shown will meet most general applications. Once you have calculated your requirements you can order the components off the page and they will be delivered from stock. They are logical, easy to understand and build. For more complex systems and for a more detailed explanation of how to order your APEX pallet racking see page 70. However remember our staff are always ready to help you!

### Beam Locks

## Complete bays for standard pallets

### Need advice on creating the perfect pallet racking solution for your needs?

Just give us a call and one of our trained advisors will be there to help.

- Highest quality on the market
- Most versatile
- Easy to configure
- Easy to assemble – all frames are delivered KD
- Kits are designed to accept all standard pallet sizes

### Important Safety Notes

- To be sure of adequate rigidity and safety, you must use at least 2 beam levels per bay and a minimum run of two bays.
- Each bay has a maximum loading of up to 8000kg, it is important that you calculate the total weight of pallets in each bay to ensure the maximum loading capacity isn't exceeded.
- Please check that the pallets used are in good condition and are suitably designed to be stored within a pallet racking system.
- All frames should be firmly secured using expanding floor bolts.
- We would recommend high level access equipment on all installations exceeding 6000mm.

**All weight loading calculations must be based on UDL (uniformly distributed load)**

### Easy-to-configure APEX Pallet Racking

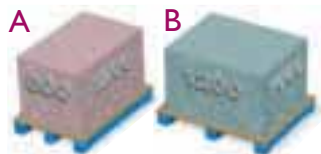

The standard complete bays meet most requirements, you can order them off the page and they are delivered from stock. They are logical, easy to understand and build.

#### 1. How deep?

You first need to decide on frame depth. While APEX Pallet Racking System can provide infinite variations to suit any need, most people use one of the industry standard pallets.

Depending on which size pallet you use will determine the depth of the racking you will need. The depth of the frame has

#### Industry standard pallet sizes

- A** 800mm wide x 1200mm deep (Euro pallet), requires 1100mm deep bay
- B** 1200mm wide x 1000mm deep – requires 900mm deep bay

been designed to allow for the pallet overhang and distribution of weight.

#### 2. What height?

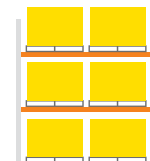

The height of your racking depends on the height of your pallets, the height of your storage area and the safe working height of your lift trucks.

Remember, provided the first beam level is no more than 1500mm from the floor, a full bay will accept up to 8000kg (UDL). So use this figure when you're calculating the number of pallets you intend to put in each bay. Within these limits, it's most efficient to go as high as possible.

Uprights are available in 3m, 4.5m, 6m, (other heights are available).

#### 3. Beams and pallets?

When calculating the number of pallets per pair of beams remember to take into account the weight of the pallet and the need for at least 75mm clearance between pallets and between each pallet and the frame.

This example shows a 75mm clearance between pallets and between pallet and frame

- Wide choice of upright heights and beam lengths
- APEX pallet racking offers unbeatable flexibility
- Beams 'lock' into uprights so the overall strength increases as weight is added

#### Accepts these pallets

	1200mm	
<b>B</b>	1200 mm x 1000 mm <b>pallet</b>	1200 mm x 1000 mm <b>pallet</b>
	2700mm beam 900mm frame	

4500mm High x 900mm Deep

#### CALCULATING THE BEAM LOADING

Each bay will accept a maximum load of 8000kg (UDL)

Each beam level will accept a maximum of 2000kg (UDL)  
up to the capacity of the bay.

Height to first beam load must not exceed 1500mm

Therefore the following maximum weight loading apply:

H3000 x 3 beam levels - 2000kg per level

H4500 x 4 beam levels - 2000kg per level

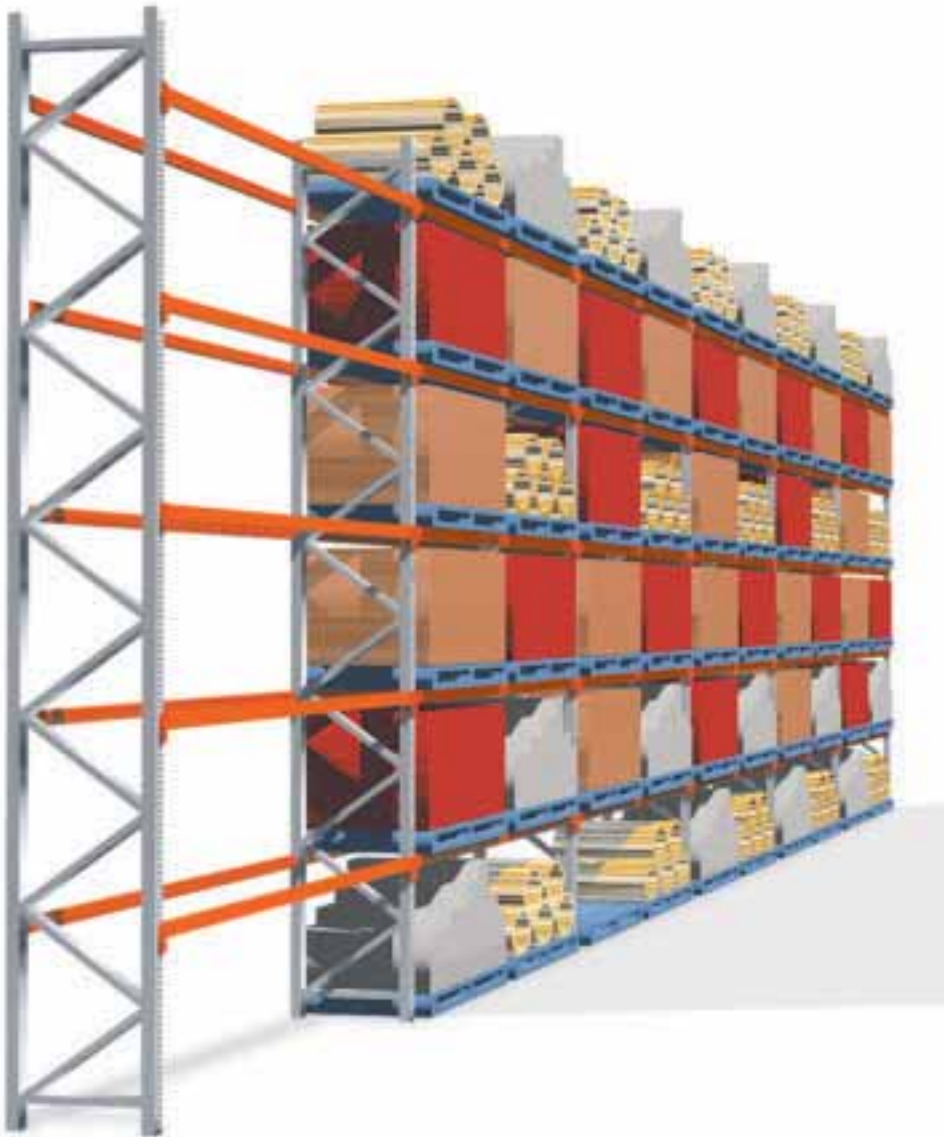

**Need advice on creating the perfect  
pallet racking solution for your needs?**

Just give us a call and one of our trained advisors will  
be there to help.

## Easy ordering APEX Pallet Racking Bay Kits

There's never been an easier way to order Pallet Racking

- APEX Pallet racking is manufactured in accordance with European and British quality approved systems ISO9000, SEMA
- Beams lock into the uprights increasing overall strength and rigidity as weight is added
- APEX bay kits make ordering your pallet racking even easier
- All frames supplied in KD Kit form

Order your APEX Pallet Racking in complete bays or component form (page 69)

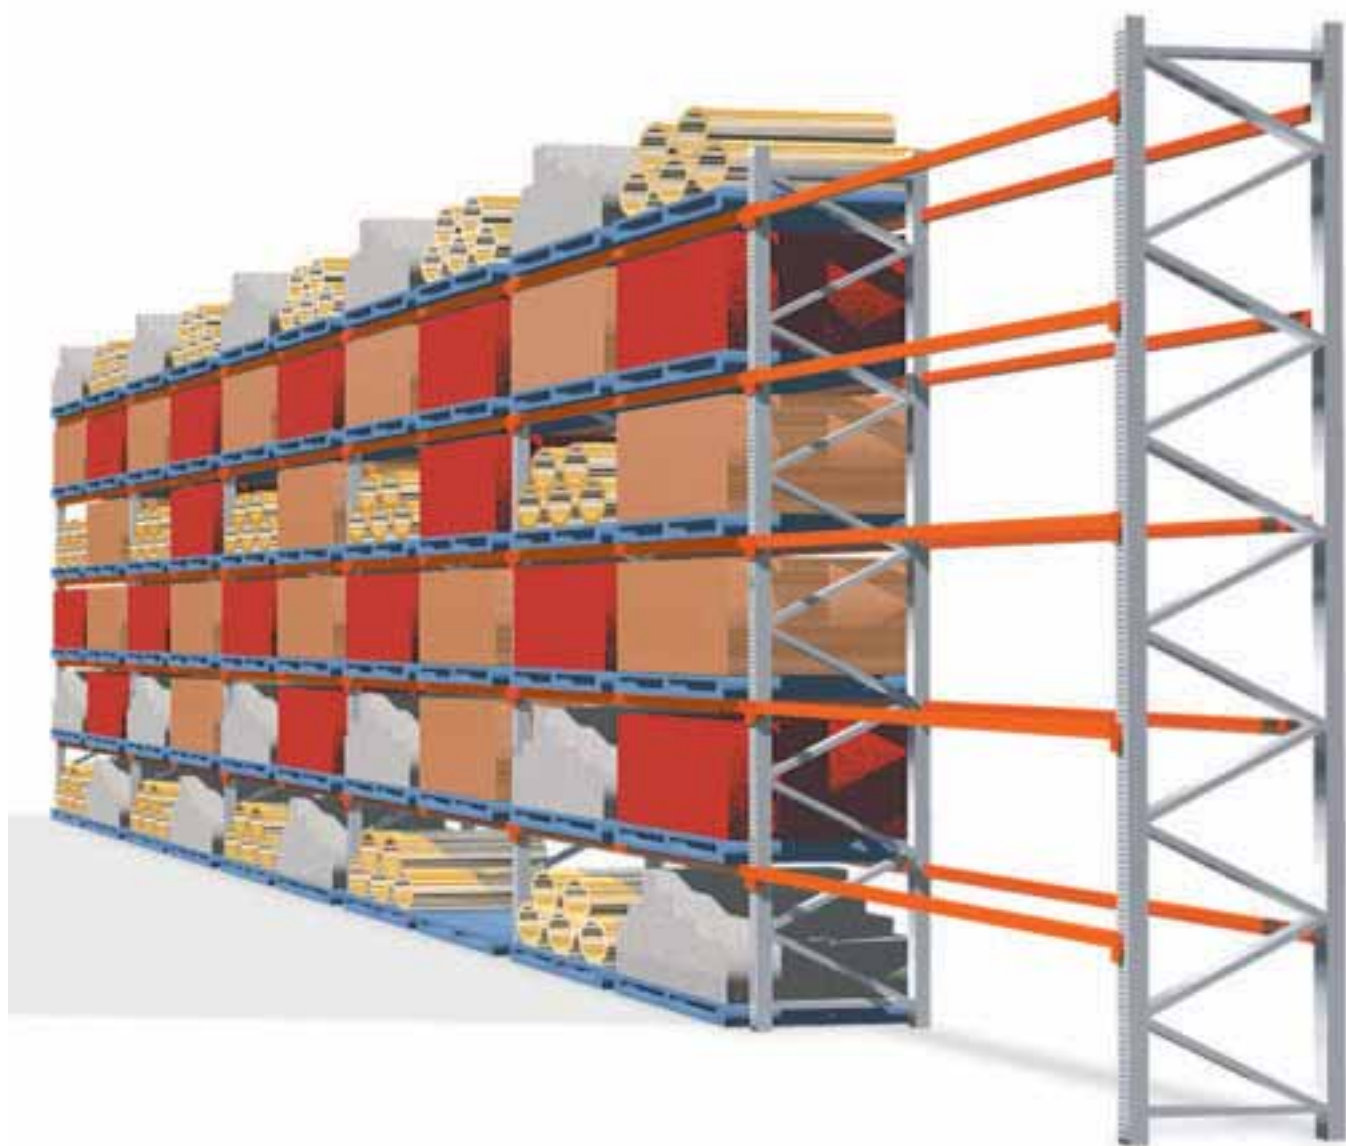

Maximum bay load of 8000kg and maximum height to first beam load 1500mm

## 900mm Deep Frames

	Type	Height (mm)	Width (mm)	Depth (mm)	Beam Levels	UDL Per Beam Level	Order Ref	Price £
<b>3000mm High Bay</b>

VWARCOL2

Rubber Barrier Protection Systems

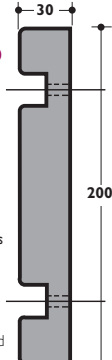

Designed to complement the spring steel systems, and where space is at a premium. Easy to fix, each Rubber Profile is designed to suit a particular application, from dock loading to simple wall corner protection.

- 4 available profiles
- Simple and easy to fix
- Weather and abrasion resist

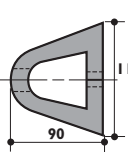

1 WALL GUARD

Standard Length 3000mm  
Material EPDM Rubber  
Fixing Method 'Hammerfix' (13 No.)  
c/w Cup Washer @ 500mm Centres

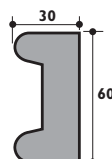

6mm dia hole—Staggered top & bottom

2 'D' SECTION

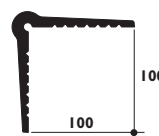

Standard Length 3000mm  
Material EPDM Rubber  
Fixing Method 10mm dia Expanding Anchor Bolts (8 No.) @ 400mm Centres

3 DOUBLE 'D'

Standard Length 6m Coil  
Material EPDM Rubber  
Fixing Method 'Hammerfix' (or similar)  
c/w Cup Washer @ 400mm Centres

4 COLUMN CORNER GUARD

Standard Length 1200mm  
Material EPDM Rubber  
Fixing Method Adhesive c/w (6 No.) Screw, Rawplug & Cup Washer

Description	Order	Price £
Column Corner Guard		
1200 x 100 x 100mm	VD1006-1	51.57
D Section 3000 x 115 x 90mm	VD1007	169.54

Tri-Block 100 (price per metre)		
Tri-Block 100 incl. fixings	VTRIBLOCK	118.79

## Standard and Heavy Duty Steel Barriers

Deflect and absorb the impact load and return to their original position

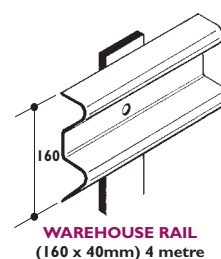

Standard duty 4 metre Rail Section with 4 x 235mm Buffer Supports

- Unique spring steel barrier system
- Designed to absorb shock load
- Internal and external application
- Galvanised finish
- Minimal Maintenance

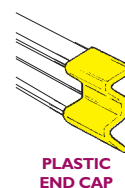

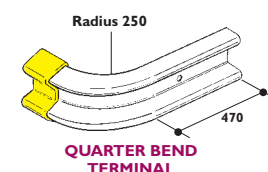

### Standard Duty

All Buffers and metal Barrier Rails are supplied with a Galvanised finish

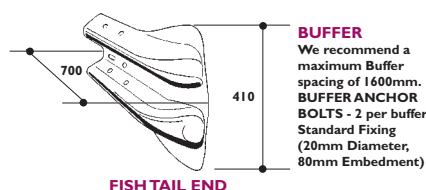

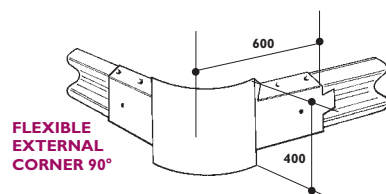

We recommend a maximum Buffer spacing of 1500mm - 1 Anchor Bolt per Buffer (20mm Diameter, 80mm Embedment)  
**BUFFER** (610mm high)  
**BUFFER** (235mm high)

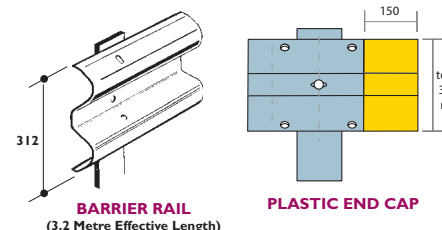

(Dimensions in millimetres)

### Heavy Duty

All Buffers and metal Barrier Rails are supplied with a Galvanised finish

FISH TAIL END

PLASTIC END CAP

(Dimensions in millimetres)

The Heavy Duty System complies with the requirements of BS 6399 Part 1:1996

Heavy Duty Rail section with flexible external corner

Description	Order	Price £
Initial 3.2m Heavy Duty Rail Section with 3 Buffer Supports & all fixings	VHDIR32	311.59

90° Bend (inc Joint Sets)	VB3005	113.60
Quarter Bend Terminal (inc Joint Set)	VB3006	74.79

All buffer supports are supplied with appropriate base plates and anchor bolts as standard

## Heavy Duty Machine Guards

Constructed from heavy duty 115mm dia steel pipe, these units are ideal for protecting machinery and work areas. Bases are pre-drilled with 22mm diameter holes for fixing to the floor (fixings not supplied). The units are powder coated yellow for high visibility.

Order	Description	Tapered Arms	Weight	Price £
		Size H x L		
A	VSMG09B	Safety Bollard	915mm	27kg
B	VSMG02L	Low Profile Guard	230 x 1220mm	27kg
C	VSMG10H	High Profile Guard	1065 x 1220mm	47kg

## Protective Rail Systems

Ideal for dividing manufacturing units, machinery and other heavy equipment in warehouses, factories etc. Constructed from 100mm heavy duty square tubular steel, these all welded units are available with single, double or triple rails in three different lengths. Mounted on square floor plates with pre-drilled fixing holes for fixing to the floor (fixings not supplied). The corner rail gives the option of creating a protective cage around valuable equipment.

VSGR23Z	Barrier Length- 2337mm	34.5kg	143.96

## Modular Barrier System

Standard and extension units provide a simple means of isolating drums or machinery offering protection to products and operators. Manufactured from rectangular hollow section steel and can be bolted together in a line or fixed at right angles. Pre-drilled base plates for fixing to the floor with 12mm bolts (not provided). Extension units are supplied with 2 joining bolts.

Order	Modular Joining Systems Description Size- L x H mm	Price £

## Essential extra safety for any racking system – Anti-Collapse Mesh Pallet Rack Safety Screens

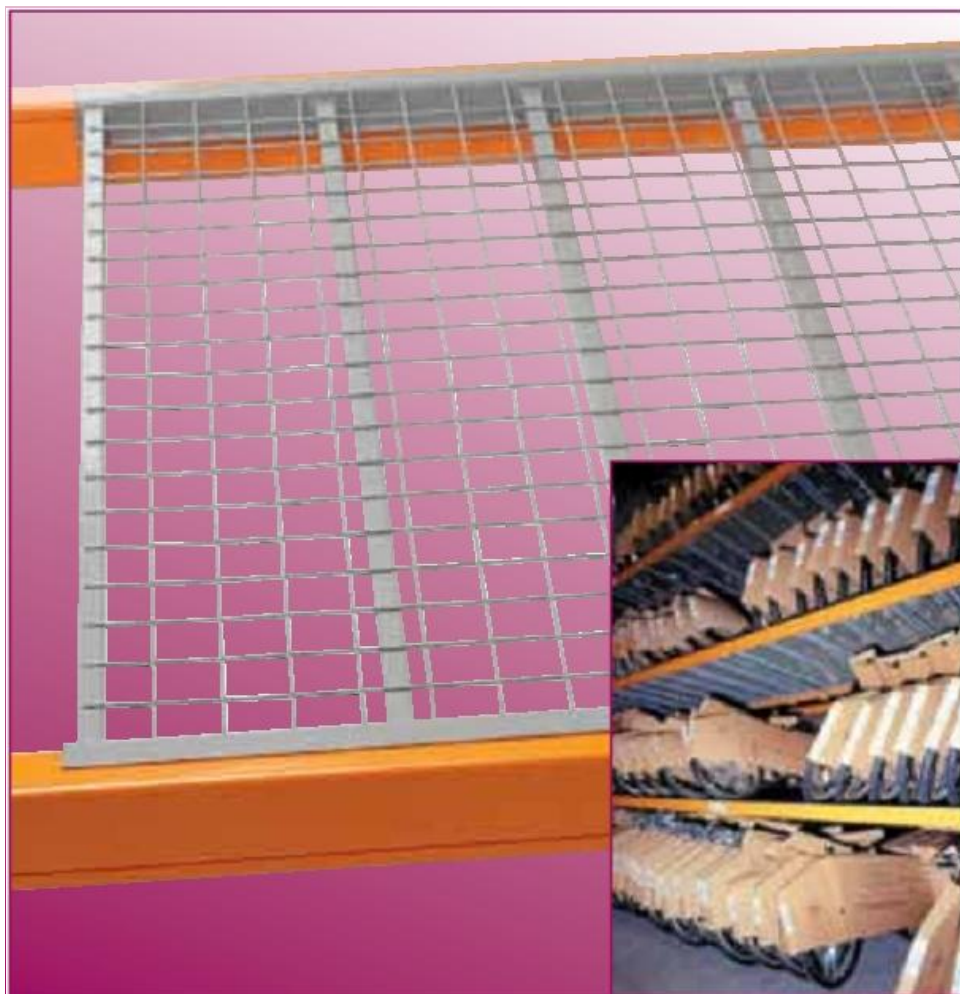

The Musca anti-collapse panels fit any new or existing racking system, which are attached using sturdy universal brackets. These stand off the racking to allow space for projecting items.

Description	Budget Price £ per sq m*
Pallet Racking Anti-Collapse Mesh Screens	34.00

\* Only applicable for standard Grey RAL 7037 finish.

The above price is a guide price only.

Specific prices for projects are available on request.

## Robust, adaptable, well proven Mesh Shelves

Mesh Shelves are easy to fit, remove and reposition. They simply locate between the racking beams and are held in place by their own weight and angle sections at the edges.

- Don't accumulate dust
- Excellent natural ventilation
- Recommended by fire authorities for use with sprinkler systems
- Cost effective drop over mesh shelving also available

Shelf weight loadings	Budget Price £ per sq m*
125kg	44.00
250kg	51.00
1000kg	69.00

\* Only applicable for standard Grey RAL 7037 finish.

The above price is a guide price only.

Specific prices for projects are available on request.

## Protect valuable or hazardous goods from interference

### Welded Mesh Partitioning

Caelum modular industrial mesh partitioning is easy to install and is powder coated for long life. The sturdy mesh panels can be hot dip galvanised for use in cold rooms and outdoors.

Description	Budget Price £ per linear m*
Welded Mesh Partitioning	111.00

\* Only applicable for standard Grey RAL 7037 finish and 2250mm Standard Height.

The above price is a guide price only. Specific prices for projects are available on request.

## Economic heavy duty Single Skin Partitioning

The Broadsword single skin angle frame system is robust and extremely flexible. You can dismantle and relocate the system quickly and easily for minimal disruption.

- For creating a production office or storage area
- Various standard heights and widths
- Can be multi-tiered
- Hinged and sliding doors available
- Special locks, pushbars, pads, break glass panic bolts and interlocks available

Description	Budget Price £ per linear m
Single Skin Partitioning	136.00

The above price is a guide price only. Specific prices for projects are available on request.

## Suitable for offices, clean rooms or factories

### High quality Double Skin Partitioning

Available options for Excalibur and Toledo partitioning:

- Flush glazing
- Noise reduction
- Coved skirting
- Anti Static/Electro Dissipative & Antimicrobial powder coatings available
- Fire protection
- Multi-tiering available
- Easy to install or demount

When combined with correct air handling & HVAC systems ISO 14644-1 Class 6 cleanroom environment can be achieved.

**BUDGET PRICE**  
(per linear metre)

**£258.00**

The above price is a guide price only.  
Specific prices for projects are available upon request.

Our technical staff are always ready to help

Fully demountable  
& relocatable

### Light Duty Single Skin Partitioning

Sabre is a light duty single skin steel partitioning system that's ideal for creating production offices or storage areas.

Available options for Sabre partitioning:

- Folded steel channel framework
- Panels in three heights and six widths
- Joints and steel sheets spot welded
- Special sizes available
- Multi-tiering available
- Hinged or sliding doors
- Wide range of locking systems
- Easy to install or demount

**BUDGET PRICE**  
(per linear metre)

**£136.00**

The above price is a guide price only.  
Specific prices for projects are available upon request.

Fully demountable  
& relocatable

## High Security Cages – for protecting fast moving, high value goods

- Ideal for tobacco, alcohol and electronic components
- Range of mesh sizes
- Expanded metal infill options
- Install on any solid surface
- Powder coated finish for indoors
- Hot dip galvanised for outdoors

Description	Price £
High Security Cages	Prices on application

advisers to help  
you plan your  
storage area**

## Multi-Purpose Storage Cages – versatile, modular mesh panel system

The modular range of Maxi and Mini Boxes can meet a wide variety of secure storage needs. Cage sizes range from the Mini Box at 1200mm x 1200mm with a single door – up to the Maxi Box which can be 6000mm wide and any length you wish. The box is easily erected and dismantled for storage and transport. Can be permanently sited on concrete.

- Inside or Outside
- All boxes come supplied with padlockable single or double door and fittings as standard

Boxes	Length (mm)	Width (mm)	Finish	Order	Price £

## Versatile machine guard system

### Strong and secure, based on modular panels

These modular systems are designed to restrict access to machinery without inhibiting traffic or wasting valuable floorspace.

#### Smart-Fix

#### Rapid-Fix

## Safe-T – complete machine security

### Combined physical and electronic protection

Safe-T is a complete, cost effective machine protection system that meets all relevant standards for machine security. The fully modular design lets you mix and match four panel types: welded steel mesh, full steel, full steel with porthole or polycarbonate material.

- Installs quickly and easily
- Dismantles rapidly for maintenance
- Thoroughly tested
- Complies with EN-953 and EN-292
- Choice of Smart-Fix and Rapid-Fix installation

Description	Budget Price (£ per linear metre)
Safe-T Machine Protection System	140.00
The above price is a guide price only.	
Specific prices for projects are available on request.	

## Safe Lock – electronically operated door lock system

- Unique patented system
- Can only be locked from outside
- Anti-entrapment safeguard
- Works with swing and sliding doors
- Supplied pre-assembled

Description	Budget Price £
Safe Lock Door Lock System	571.00
The above price is a guide price only.	
Specific prices for projects are available on request.

## Easy-order Steel Gravity Conveyors

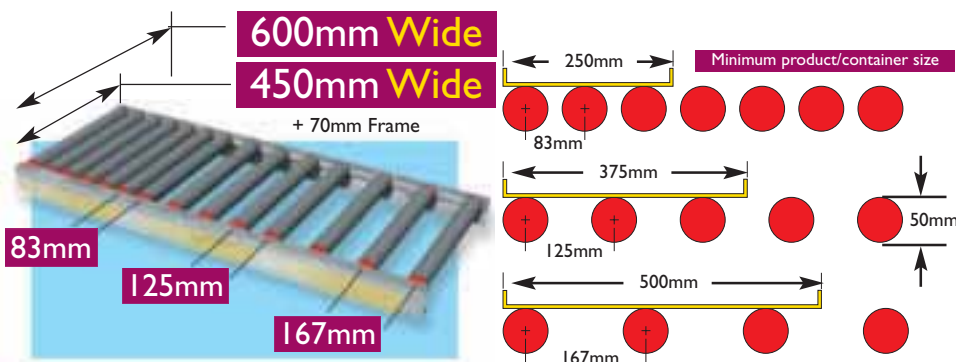

We've made product selection as straightforward as possible.

1. Choose roller width – 450mm or 600mm.
2. Divide the container length by 3 to determine the roller pitch.  
(So if your containers are 500mm, the roller pitch will be 167mm.)
3. Choose your layout, using the standard components shown opposite.
4. Submit your requirements for quotation

If you need any help just give us a call

1000mm Gate unit

Ball Table

## Weight loading 110kg per linear metre...

### A note about accessories

The leg assemblies will fit either width of conveyor; anywhere in the length of the system. They will adjust in height from 570mm to 1020mm to let you adjust the gradient. Leg assemblies must be placed no more than 3000mm apart. Gate sections are supplied with legs, and corner sections are supplied with one supporting leg to the circumference (see diagram A).

You'll need joining plates where sections meet (see diagram B).

You can also join end stops where necessary (see diagram C).

Corner units keep the product/container on the right course

Please make your selection from the items on this page and we will provide budget quotes

The range of bollards, hazard markers and low level signage is designed for rural, urban, heritage and industrial areas where clear marking of routes or protection of sensitive areas is required.

- Moulded from tough polyethylene material
- Durable and maintenance free
- Choice of ground fixing options
- New recycled ECO option available
- Choice of reflective banding colour

## Heritage

The Heritage traditionally styled bollards form part of the coordinated Heritage range including low level signage and litter bins (see page 280). They combine first rate functionality with a stylish appearance

## Sentinel

The Sentinel range offers a contemporary, versatile and multi-functional bollard that is suitable for a wide range of urban, retail and industrial locations. A range of complementary Sentinel low level signage is also available

## ECO Bollard

In response to the growing demand for environmentally friendly products we have also included the latest ECO bollard manufactured from 50% recycled plastic and 50% regular polymer.

S230 Range - Single & Double sided Signs

R300 Range - Single & Double sided Signs

## Ground Fixing Options - Four options to suit most applications

### Anti-Ram Fixing

Provides an effective deterrent to ram-raiding

### Permanent Fixing

Bollard base is concreted in below ground

### Socketed Fixing

Where occasional removal or replacement is required

### Surface Fixing

Fixed directly to a shallow concrete substrate

## Magnetic Easy-Wipe Racking Strip

Sticks to any steel surface, but removes instantly if need be.

Simply cut to length. Five colour options:- White, Yellow, Red, Blue or Green.

Simply add the letter of the colour you wish to order to the code below.  
E.g. VMSR I-B (for blue)
