Complete META Quick S3 Boltless Shelving Kits

Planning information:

Starter bay:

Shelf length + 56 mm

Shelf depth + 36 mm

Add-on bay:

Shelf length + 6 mm

Shelf depth + 36 mm

Safety note: Racks with a height to depth ratio more than 5 : 1 should be fixed to the floor to prevent tipping. Bay loads are based on runs of 3 or more bays.

- Value-for-money boltless META QUICK S3 with flat packed frames for light loading of the shelves with 80 kg or 150 kg
- Bay load capacity up to 1380 kg
- Shelves adjustable on a 25 mm vertical pitch
- 80 kg shelves without perforation: limited use of accessories
- 150 kg shelves with perforation: full use of accessories
- Front edge of the 80 kg shelf: 25 mm
- Front edge of the 150 kg shelf: 40 mm
- Rapid assembly without tools
- Pre-galvanised finish with optional powder coated RAL 7035 light grey
- Note: For technical reasons the frame spacers are always in pre-galvanised finish
- All load capacities based on uniformly distributed load and on runs of three or more bays

Call us now for more details

Linspace

More features for your money than any other shelving system.

Linspace is totally unique. The four way upright (shown right) allows bays to be added in any direction – even on top of each other. This allows the system to be truly modular.

The huge range of accessories then allows the user to exactly tailor the system to their individual needs. It also lets you add to, or alter the system as operations change in the future without fuss, whilst automatically maintaining its inherent strength.

The Linspace Upright

The Linspace Upright is unique and is the backbone of our system.

It gives you a stronger bolt-free system that's more versatile and easier to assemble – and expand! Available in a selection of heights, it offers complete flexibility when designing new storage facilities

Stronger shelves, more choice ...

1000mm wide shelves are available in either 135kg, 185kg or 270kg UDL. 1250mm wide shelves are available in either 100kg or 150kg UDL. They are clearly marked on each shelf front to eliminate any confusion in use and many users choose to have a combination of each often within the same bay run.

...page 45

More system options

Linspace has some unique options available: Please contact us for more details

Motor part bays – again joins directly onto Linspace to accept awkward shaped products.

Multi-tiers – any single bay of Linspace purchased today – can be extended upwards to create two or three tier storage installations.

...page 318

Linbins® the perfect partner

Widely used in almost every industry, these extremely versatile containers can be used in conjunction with shelving or Louvre Panels. Available in ten sizes and six colour options, they make an ideal method for small parts storage and product identification.

...pages 8 to 12

Stronger bays

Each bay will accept a massive loading of 945kg as standard. Any of these bays can be upgraded even further to accept a load of 1620kg. This means that you do not have to plan your storage around the heaviest product and should you have the need to increase the strength in excess of 945kg you can simply add the upgrade kit to that single bay even within the same bay run.

...page 45

So strong that no cross-braces are needed

Products can be stored and picked from either side of the bay without having to plan the stock around awkward cross-braces.

Also, in the future if you need to move or add a bay – it's easy, as you don't need to calculate the position of cross-braces per run of bays, as you do with other systems.

...page 44

For security and to divide space just add cladding

Solid or weldmesh cladding is available for the side or rear of bays. Because the cladding isn't needed to add bay strength you can just add where needed and also change or move to suit. Simple clips let you add cladding in seconds to any chosen bay.

...page 50

As with any product in the catalogue simply ...
GIVE USA CALL and we'll help you choose
the best system for your needs.

More storage with louvre panels

To increase the storage area simply and effectively join louvre panels to the end of bay runs. Use them with Linbins to create valuable extra storage space. ...page 51

Linbin Trays for faster packing

The perfect answer to high-density small parts storage and available for 400mm and 500mm deep bays. End stops are available to prevent travel beyond the shelf edge. ...pages 22 to 23

Shelving Accessories

This is where the Linspace really comes into it's own. On the following pages you will see just how to create exactly the right storage system for your needs:

- Security doors
- Shelf fronts
- Shelf protectors
- Bay upgrade kits
- Cladding
- Shelf dividers
- Louvre panels

Linspace Bays – for custom-built flexibility

EASY TO ASSEMBLE

Bases

1. Uprights simply slot into C section fittings to join runs of bays together. All front bases are common, rear bases fit into a rear channel.

Top covers

2. Simply position the top covers and tap them into place. You now have an immensely strong and rigid unit.

Finishing

3. Fit the high visibility safety clips to prevent accidental dislodging of components.

Plan your perfect storage solution, build it with modular ease

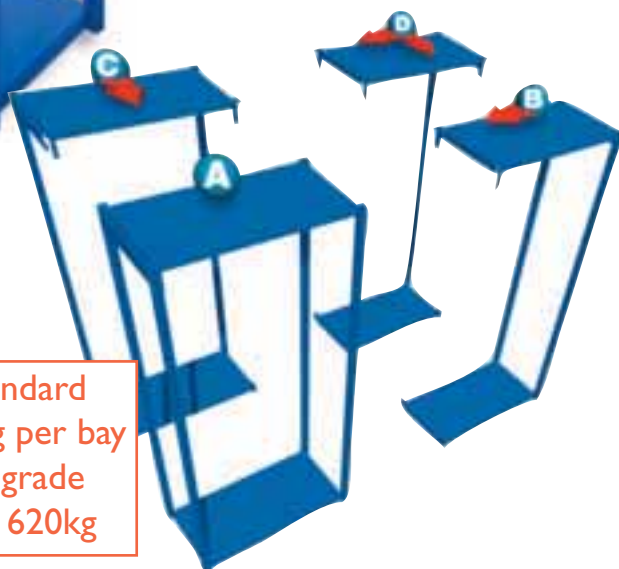

Freedom to plan your ideal storage solution

- Various dimensions available – 2 widths, 2 heights and 5 depths
- 945kg and 1620kg weight capacities
- Entirely free-standing
- Easy assembly builds in minutes – slots together without the need for bolts
- No need for cross-bracing – unique Linspace uprights connected to the base and top create a rigid unit

Modular design

- Add, remove or reposition bays as required
- Flexibility to work around overhead obstacles such as pipework with repositionable top cover

**Standard
945kg per bay
Upgrade
to 1620kg**

First Bay Front is freestanding and has top plus base, four uprights and fittings.

Add Bay Front which has top, base, two uprights and fittings.

First bay rear includes top, base, two uprights and fittings.

Add bay rear which has one upright, top, base and fittings.

1000mm and 1250mm Bay ranges

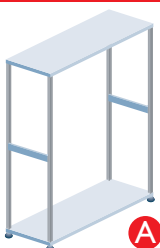

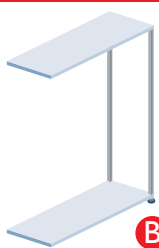

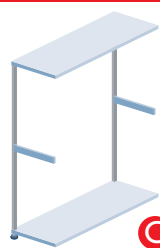

Order shelves separately

Two widths, two heights, five depths, two weight capacities and a wide range of accessories. For Standard Packs see pages 46-47

600mm	HS1260PK1	319.65	HS1260PK2	560.27	HS1260PK3	800.89

Planning your storage area is easy

1. Calculate the floor space
2. Decide what depth units you need
3. Single-sided or back-to-back?
(Allow for aisle widths of at least 900mm)
4. How many standard 1000mm or 1250mm wide bays will you need?
5. Finally, decide whether you require extra shelves accessories such as cladding, dividers or louvre panels

2 x Double Entry Bay
W1000 x H2200 x D500
£990.71
HD1050PK2

i Please always allow an extra 40mm to each bay run i.e. a 4m run of four bays – allow 4040mm total.

Louvre Panels

— adds extra storage to the end of bays

Linspace louvre panels fit bay ends and are designed to carry your choice of Linbins. Fitting is quick, easy and needs no tools. When in place, the panels are strong and secure — yet they can be dismantled just as easily.

Linspace Doors

— turns shelving into secure storage

Once your shelving is fitted with cladding, you simply add doors to convert it into secure storage. Use 1000mm high doors to fit any height within a bay — and the 1800mm or 2200mm doors to fully fit the bay front. Another option of secure storage are lockable cabinets shown on page 102.

Linspace Door Sets

Door Set	Size W x H	Order	Price £
1	1000 x 1050	HLBDS1050	299.18

**Helping to set
the standards
of design and
manufacturing
within industry**

Apex Longspan shelving is designed and manufactured in accordance with all major European and British quality approval systems (ISO9000).

Meets and in many cases exceeds all standards set by SEMA (Storage Equipment Manufacturers' Association).

Longspan components

3 Steps to Shelving Success

1. Work out how many frames you need

There is just one standard frame in multiple heights and depths. Simply allow two for the first bay, then one for each add-on bay.

Frame Height	Depth 450mm Order	Price £	Depth 600mm Order	Price £	Depth 750mm Order	Price £	Depth 900mm Order	Price £

Hygienic racking for clean environments

– for the food, pharmaceutical and catering industries

This versatile racking system is specially designed for use where hygiene is the overriding priority. The units feature a unique construction that makes them easy to dismantle for regular deep cleaning. Standard units are made from aluminium or cream plastic. Red, green and blue plastic units are available to special order:

- Extreme temperature +60°C to -40°C
- Aluminium or high density plastic
- Static or mobile
- Suitable for cold stores
- High load capacity – 360kg UDL
- Smooth non-porous surfaces
- Quick strip-down for deep cleaning

Hygienic Static Bays

1500mm high, complete with four shelves – extra shelves available
